

# CHRISTOPHER J. FISCUS

## Bioinformatics Scientist

Experienced scientist specializing in plant evolutionary genetics, genomics, and bioinformatics, with a proven track record of successfully driving research projects.

Committed to making a meaningful and lasting impact by driving positive change and contributing to advancements that benefit society.

## RELEVANT EXPERIENCE

Present  
|  
2022

### Postdoctoral Researcher

University of California, Irvine

📍 Irvine, CA

- Designing and executing 3 original research projects in population and quantitative genetics by combining domain-specific knowledge with data analysis and visualization
- Creating and implementing bioinformatic pipelines and workflows to analyze next-generation sequencing (NGS) data in a high-performance computing (HPC) environment
- Communicating progress towards project objectives to stakeholders in a variety of mediums including oral presentations and written reports

2022  
|  
2017

### Graduate Student Researcher

University of California, Riverside

📍 Riverside, CA

- Executed 3 original research projects in computational biology, genomics, and population genetics as part of 2 international collaborations resulting in 1 peer-reviewed publication, 2 oral presentations, and 4 poster presentations
- Demonstrated leadership and project management skills by managing 5 direct report mentees
- Designed and implemented bioinformatic pipelines to analyze next-generation sequencing (NGS) data in a unix-based high-performance computing (HPC) environment

## EDUCATION

2022

### PhD Genetics, Genomics and Bioinformatics

University of California, Riverside

2015

### BS Biotechnology

University of California, Davis

## CONTACT INFO

📞 +1 209-613-9384

✉️ [fiscuscj@gmail.com](mailto:fiscuscj@gmail.com)

in [/in/cjfiscus](https://www.linkedin.com/in/cjfiscus)

## SKILLS

### General

Data analysis  
Data visualization  
Statistical programming  
Project management  
Problem-solving  
Communication

### Programming languages

R, bash, python

### NGS analysis & algorithms

bwa, GATK, samtools, bedtools, fastqc

### High-performance computing

slurm, CentOS, Unix

### Misc computational tools

conda (package manager)  
git (version control)  
snakemake (workflows)

## HOBBIES

### Music

play guitar and bass

### Photography

landscapes, astro, plants
